Honeywell Instant Alert System

Instant Alert for Schools is an essential internet based tool for notification and communication which allows the school system to deliver a single, clear message to the students' parents or guardians via a communication of their choice. Instant Alert allows each family and employee to maintain a secure, password-protected online profile. The link for the Honeywell Instant Alert System is:

<https://instantalert.honeywell.com/>

It is the responsibility of the employee or patron to make the school system aware of any contact information change. If there is an issue with this system, the building school secretary should be contacted, and at that point, the secretary will forward the information to Jeff Mason, Data Manager, for Rockbridge County Public Schools.
